## EXPERIENCE

### Junior Software Developer

#### Utah Tech Labs

📅 Mar'24 – Present

📍 Kolkata, India

- **Client Collaboration and Requirements Analysis:** Collaborated closely with clients to gather and transform requirements into practical development plans, directly impacting client satisfaction by improving clarity and delivery.
- **Feature Development and Code Optimization:** Spearheaded the development of key features that improved usability and performance. Upgraded the entire codebase to newer versions, enhancing site performance and security, which reduced system load times by 30 percent.
- **Multi-Client Project Involvement:** Managed and contributed to various projects across multiple U.S.-based clients, efficiently handling diverse workloads and maintaining timely delivery, impacting project completion rates positively.
- **Client Collaboration and Requirements Analysis:** Acted as a full-stack developer with a focus on 75 percent backend and 25 percent frontend development, impacting project cohesion and functionality across the stack.
- **Tech Stack :** MERN, SQL, Git, Google Cloud, Microservices, React.js and Next.js.

### Associate Software Developer

#### Adintors

📅 May'23 – Feb'24

📍 Ahmedabad, India

- **Backend Architecture and Development:** Led end-to-end backend architecture using Node.js, Express, and Azure services and increasing reliability.
- **API Documentation:** Created Swagger API documentation for clear, accessible guidelines, reducing onboarding time for new team members by 25 percent.
- **Quality Assurance through Unit Testing:** Applied unit testing, achieving a 20 percent reduction in post-deployment issues and ensuring high code reliability.
- **Azure Integration:** Integrated Redis caching and Azure, improving response times by 35
- **Cross-Functional Collaboration:** Coordinated across UI/UX, mobile, and frontend teams, achieving on-time project delivery.
- **Tech Stack :** Node.js, Express.js, JavaScript, DevOps, Azure-CosmosDB, Docker, Swagger, Microservices and Mocha Chai.

### Software Developer Trainee

#### Technomark

📅 Jan'23 – May'23

📍 Ahmedabad, India

- Built backend APIs and added real-time chat, boosting user engagement.
- Utilized MongoDB for efficient data handling and scalability.
- **Tech Stack :** HTML, CSS, JavaScript, Node.js, MongoDB, Express.js and Socket.IO.

## EDUCATION

### B.E (CE)

#### Gujarat Technological University

📅 2019 – 2023

📍 Gujarat, India

### Higher Secondary

#### CBSE

📅 2018–2019

### Secondary

#### CBSE

📅 2017–2018

## PROJECTS

### Real-time ChatApp | [PROJECT LINK](#)

- Developed a chat application.
- **Tech Stack :** web socket, CSS, Node.js.

### Adintors

- Influencer and Brand Connecting Application.
- **Tech Stack :** Node.js, Express.js, Azure Cloud, MongoDB

### Apium Delivery

- Apium Delivery is a delivery application and website serving the US market.
- **Tech Stack :** Node.js, Express.js, REST APIs, Git, React.js, Next.js, SQL, Google Cloud

### Craveble

- Craveble is a food delivery application and website serving the US market.
- **Tech Stack :** Node.js, Express.js, REST APIs, Git, React.js, Next.js, MySql, Google Cloud

## TECHNICAL SKILLS

### Skills

Backend Dev Web and App Dev  
Communication Rest API Testing  
Frontend Dev Team Management

### Frontend & Backend Languages

HTML CSS Javascript Node.js  
React.js Express.js Socket  
MongoDB SQL Devops Next.js  
Typescript Python

### Tools and Technologies

Google Services Azure Services Git  
Docker, Kubernetes Mocha, Chai  
Swagger Postman AI tools prompt
